Press bulletin issued from
ministry of defence -
defence space comand..

..A large asteroid is presently on a collision
course with earth.Estimates make it at
roughly 6,300 square kilometers in size.

Our scientist in NASRDA working in conjunction with NASA have
been unable to explain how the asteroid escaped early detection...

...However,it is indeed happening.
It is happening now.

At its speed the asteroid will impact within
20min.Our scientists agree unanimously
that the impact zone will be...
...LAGOS,NIGERIA.

Asteroid heading for lagos. If I wasnt seeing
it with my own eyes I wouldn't believe it.

wow,its big,
burning and
moving fast.

What do I do?
shatter it?
burn it up?

No,hazard from
falling debris
or thick smoke
cloud.

slow it down
instead.stop it.

Uunnh!!!

Cmon,cmon,

Sounds of the
city is getting
louder.closer.

Gaiya...

*You have been given
Many gifts but like all men,
each gift has no limit.The
only limits are the ones you set
for your self.Always believe,
always have ...*

...faith.

Its not slowing
down...

Still...not...
slowing...down.

I can do
this...

AAAAA

Oh my God it's stopped!

How?

stopped!

I did it.

I can see everyone looking up. I see them but they can't see me... they are frightened but unhurt.

No one dies today!

Throw it into the sun.

Its over.

Problem solved.

Now i'm beginning to understand what Gaiya has been trying to teach me

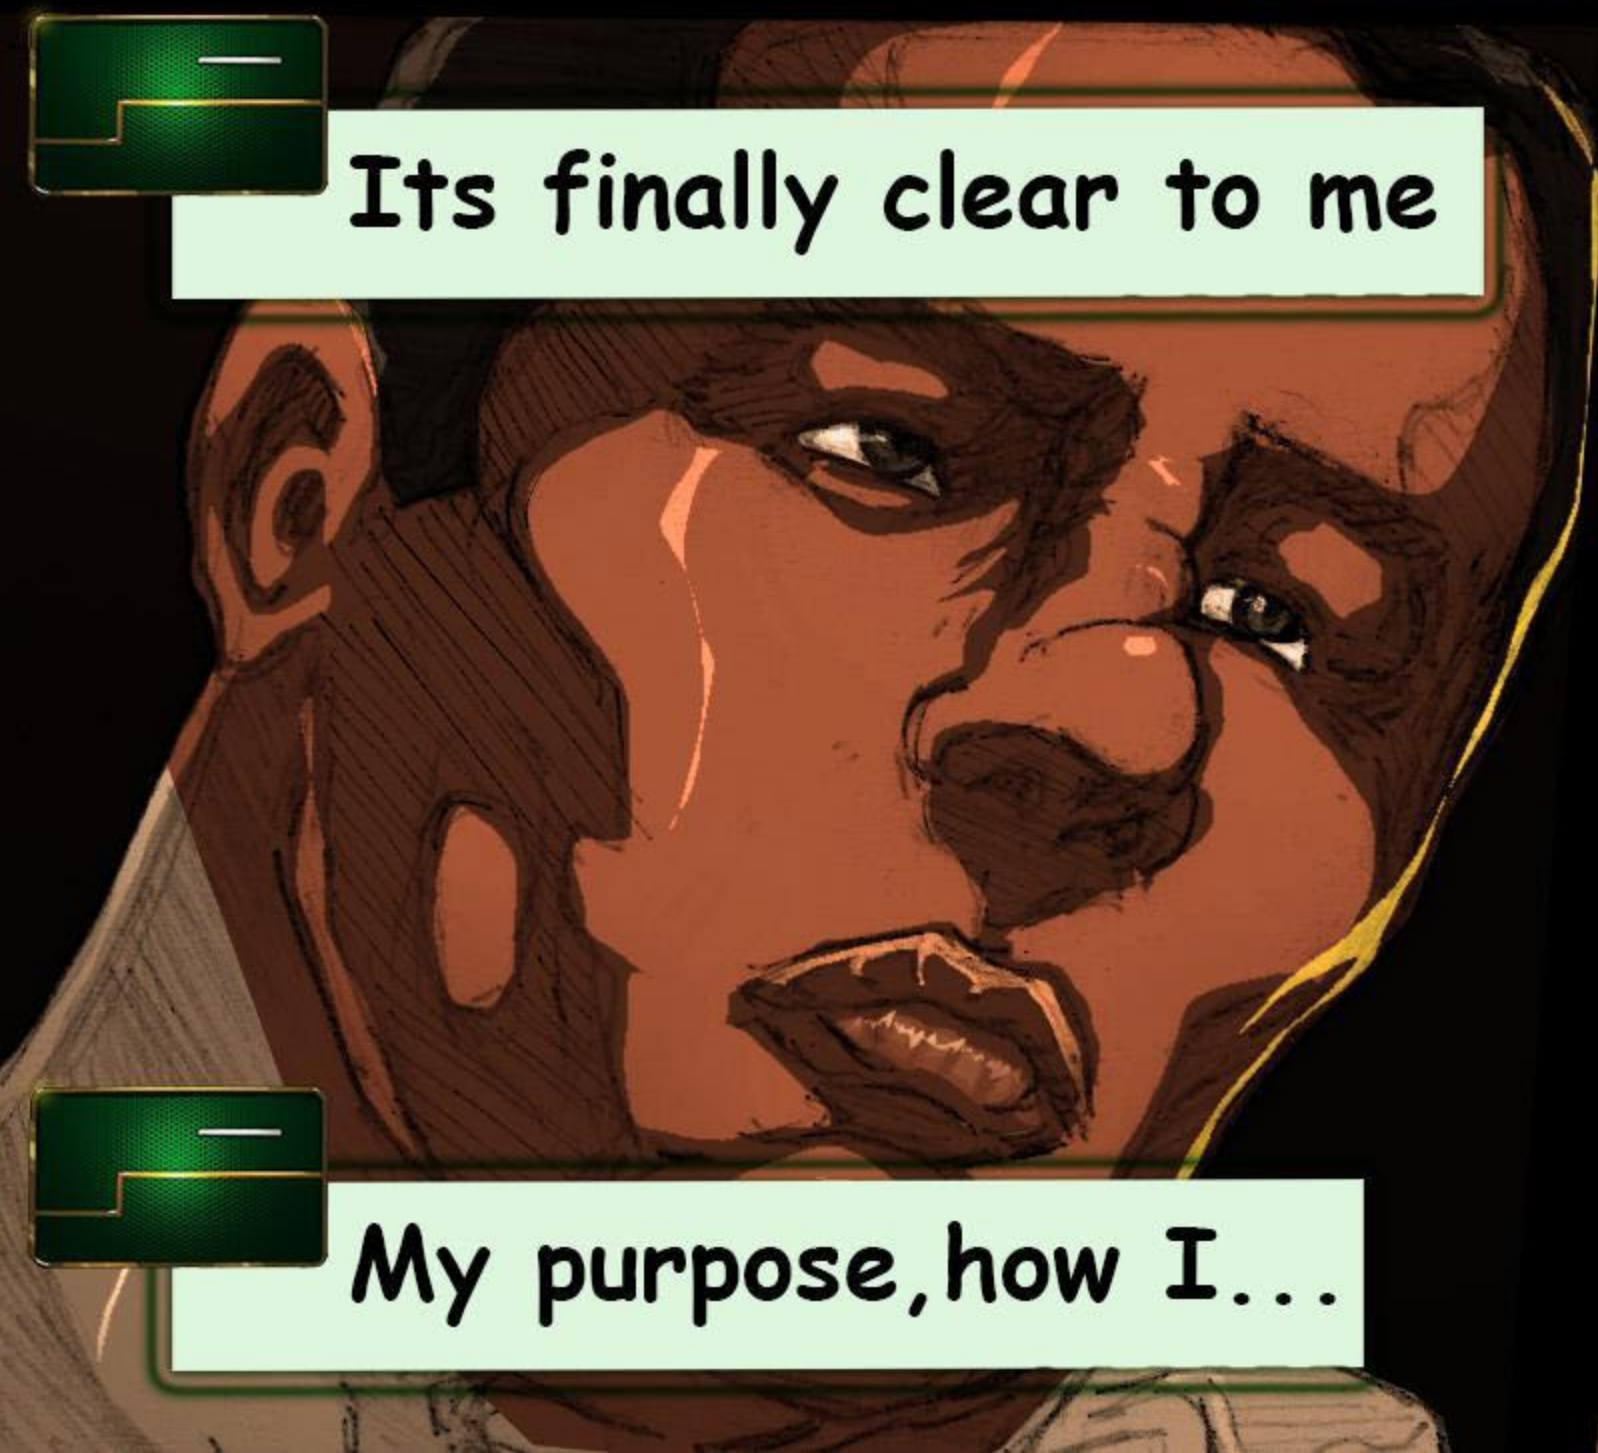

I did it.

Its finally clear to me

My purpose, how I...

...

OH NO!!

How can I be so blind!

The intense heat from entering the Earth's atmosphere would have weakened the thinner parts of the asteroid, especially along the edges.

So while I was pushing the asteroid back out, pieces of it would definitely have fallen off. Hurling back down and hitting the ground like bombs.

lives are at stake!

Took me 15min to get back

Hope i'm not too late

They saved us!

Thank God they where here!

They saved us?

Whats going on?

Officers!

How may I be of service?

Excuse me Mr. Guardian Prime, sir.

He's Max Speed, I'm Power Box, the guy with the gun is Nu-tech. We are...THE

Comic republic is a community for comic lovers with the goal to pass on the right message, views and morals to our generation and the next. We intend to achieve this by creating iconic characters and telling amazing stories that will inspire people to be better. We believe Nigeria can be great... WILL be great and we want to be a part of the transforming process.

We are a team of five talented individuals (if we can say so ourselves). We are:

Wale Awelenje
Jide Martin
Michael Balogun
